

SUSTAINABILITY REPORT 2024

We generate in our own facilities **2,185 tons** of compost.

We reduce our footprint by nearly **1,000 tons of CO₂** emissions, compared to 2023.

We incorporate more than **200 million tons** of organic harvest waste into our fields.

We do **organic farming** on **939** open crop acres and **98** greenhouse acres, all CCOF certified.

Bee **friendly farming**.

We use **100% drip irrigation**. This system allow us to **save 70%** of water.

Full crop rotation program and other concrete actions that protect soil from degradation and erosion.

Our packaging materials are **100% recyclable**.

800 trees planted, preventing emissions of **24 tons of CO₂**.

Birational practices. We continue reducing use of chemicals by natural alternatives. Today we use up to 70% less compare to 10 years ago.

19,708 square feet of **solar panels** added.
